Dear Parents and Carers,

The week beginning 13<sup>th</sup> March is British Science Week and we are planning for our children to have a fun filled week investigating and using their Science skills in the classroom and in the school grounds.

We should also like them to learn about the practical applications of Science in the real world and to find out about science related jobs. We would be very grateful if any parents who work in Science in any field would be willing to come in to school during Science week to talk to the children about their work. On the back of this letter I have attached a list of Science related jobs, but this is by no means exhaustive.

We would hope not to take up too much of your time and we feel that it would be a valuable experience for the children.

If you think you could help us in this way or have any questions, please speak to me.

Thank you.

Yours sincerely,

Mrs K Common
